Antonieta

1992

Saturday Nov. 27, 1926. Another <sup>(1)</sup>  
busy day during which I lost or mis-  
laid my indispensable "Tomahawk"  
Hammer, etc., & nail puller combined.  
One of the most useful tools I had. As  
was not taken out the door? And  
to make myself, — buy a mattress,  
a pitifully thin cotton blanket & some  
money. a bucket to wash and  
therefore in. Healer wanted 32  
cents for mattress, got it for 25¢ —  
for blanket he asked 12 I offered  
eight, but doing 20¢ more walk  
and with my purchase. Got started  
at 3 p.m. & was agreeably surprised  
at the size of my home to be. Every  
thing a lot of a kind with  
a pump that functions after a  
fashion. I have a trunk with  
so much room under it &

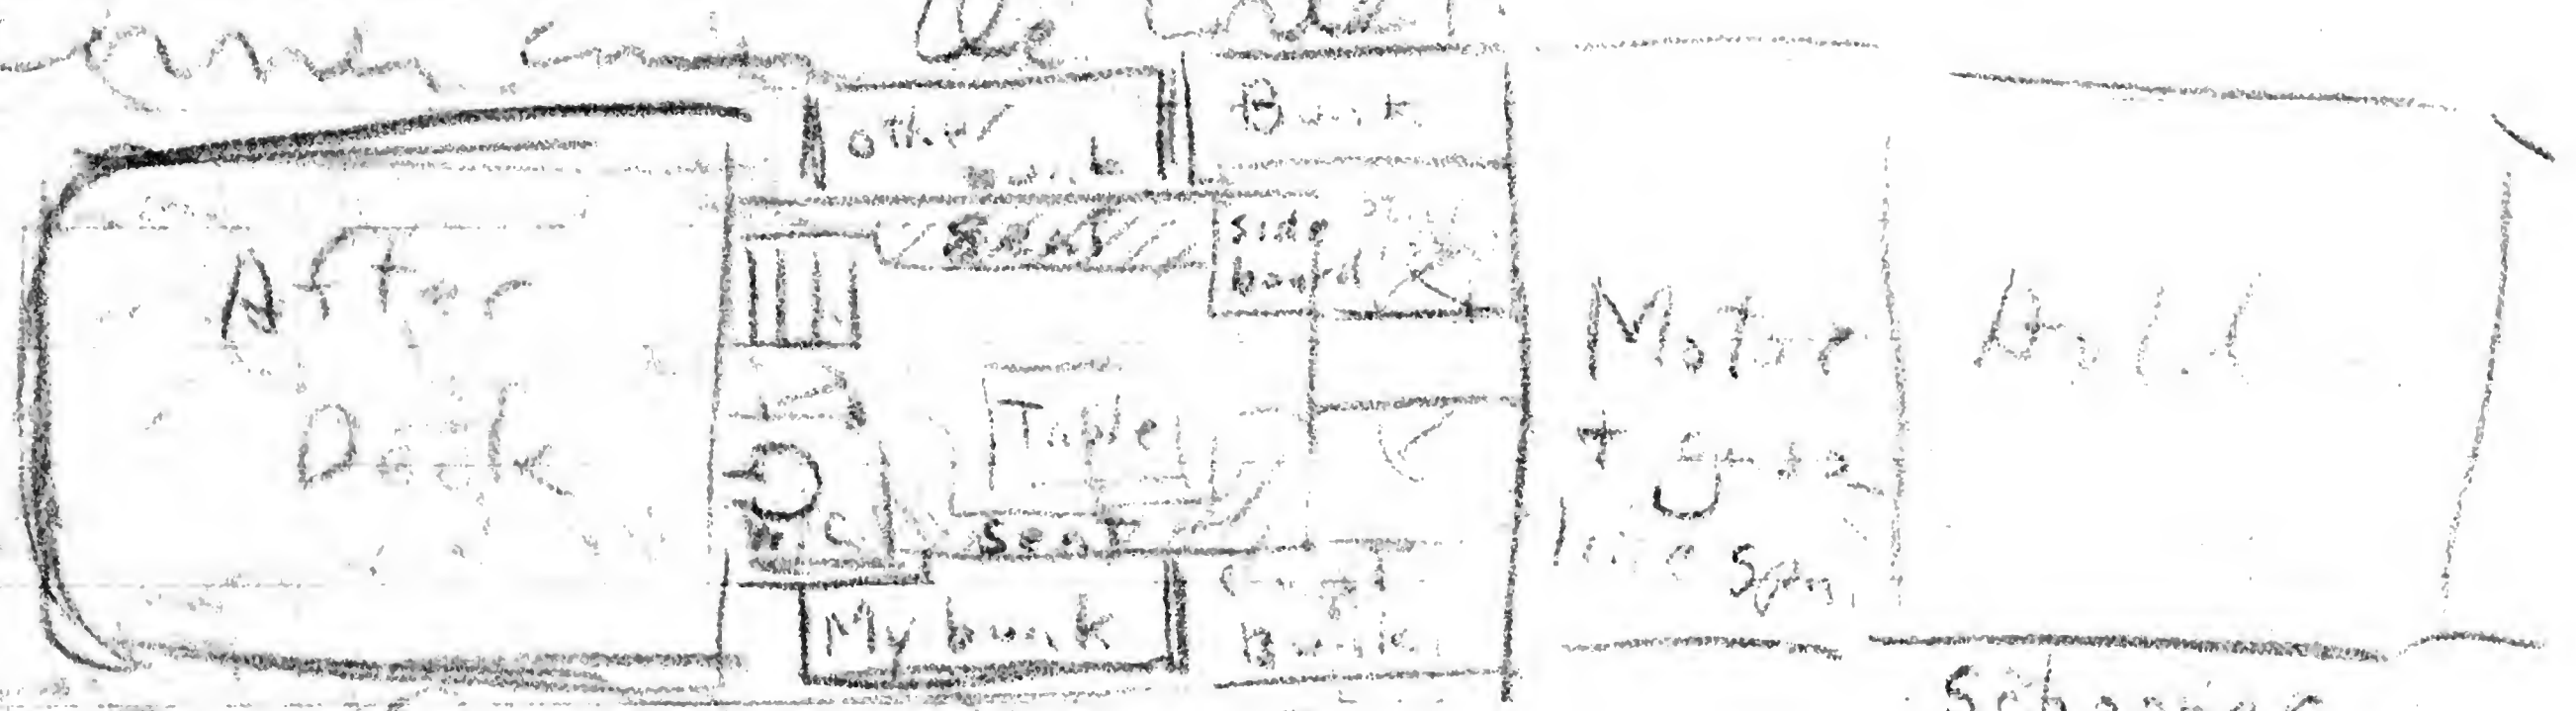

<sup>2</sup> would have thought my the quick  
head of moment I don't know  
why I was held down on the ground  
they have room to burn. She says  
that the three delayed only there is  
a garden in the middle of the hill  
the night, didn't get up until  
I don't know why I was put off all  
Sunday. All kinds of things were  
except of the coats & I have put  
up my hotel room. I had no place  
to go to besides I wanted to see  
the place again.

This morning being winter Sunday  
arrived Nov. 28 - 1926. Got up  
at six though I got very little  
sleep till about 4:30 a.m.  
when the day began to warm.

Washed up a bit. Almost forgot to wash  
through. I was washed & I felt  
my other flannel with my water bottle  
under the head of the mattress for  
even if a pillow. But we got  
into a whole part in one thing after  
another till brown morning had left  
in but my shoes & that was scarcely  
enough. I thought instead of later  
off. I think I'll add my  
sweater. Wish I'd bought a couple of decent  
its almost too warm for comfort. At  
6.30 had a cup of coffee for breakfast  
& then stayed all till afternoon  
wherever that is the room, the better  
I hope. Had the surprise of my  
life when about 7.30 a shoe box  
brought off a middle-aged woman  
→ the school teacher of the  
children in the island. There are  
two little state rooms after one of.

which the shipper occupies. As for  
 I French descent. The language here  
 the other of the point if there is one  
 in a little briny on the side, one of the  
 in name, the other 3 hours are the full  
 complement I guess till we are  
 under way. I gather from what the  
 engineers said he goes up the river.  
 Our cabin proper about 14 x 11 feet  
 not counting berthing but out of the  
 corner corner the table.

So long we are  
 still staying around  
 and don't know  
 a trace. One of the  
 men went ashore the  
 other day and a storm, could not work

from her, but the book will be <sup>5</sup>  
to reserve. I'd counted on a ~~book~~  
of some kind on the island but now  
the school teacher will probably  
get the only of one and that is I  
planned to buy a copy to save again  
Kronle, who I had known done had  
we sailed yesterday. The delay  
is going to be the only one I can't  
live with the Island and trip besides  
losing me time on the island. I  
can only hope that all will join  
at all right. I just heard the  
engine turn over a couple of times -  
now 9 a.m. I'm going forward to the  
airlock. I lay down at  
6:15 a.m. + were still here, had a  
little fuel run but the engine is still  
not going well. I had intended  
to go this a.m. but when I saw  
the little report I should have  
was about in his under shirt, I was

6 Sunday night everybody changed  
astire & I changed from my old  
letter & went to with the engineers  
we took in a movie - I am to make  
"The Grandchildren and the winter."

Monday had 29 got under way  
at 9/30 engine going but not  
altogether good. I am not writing  
much these days (I am now  
sweaty man). I will search  
that you can notice it, & eat  
all meats, but I do not feel  
like anything but as equally  
happy bird. The matter is not  
the conducive to the most comfortable  
feeling. Monday night I  
made a tennis ball bet in  
8, 10 & 8.20 p.m. securing a victory

Scalps and antlers for well as in  
the latter case. The latter were  
of the same I got from the bottom of  
the river. And some have slipped  
away from the bottom of the ship.

Today had 30 made and the  
hand with two at the morning  
about for 650-720 a.m. and  
turned up a number of <sup>scyphozoan</sup> scyphozoan  
bells in rather bad shape, + there are  
possibly a few others to be found on  
line examination. There was a few  
darting about in the dish before I left  
it. Beginning something in the night  
we have been troubled + even the  
engine has been out of commission.  
now at 1130 a.m. the engine just  
got it going again. It is a  
so-called semi-diesel but the  
old one and really in need of

8 Overhauled. That's what they had  
to do after each attempt to start -  
put out a time. The work is  
interesting and does well with it  
he has the work with him having  
coffee between 6-7 coffee only. Then  
at about 9 there is tea & bread  
& butter. At lunch there is a  
fried beef smother with sauce  
baked potatoes, bread, butter & tea.  
Oh! I forgot you had off with some  
soup. ~~At 3 p.m.~~ At 3 p.m. there  
is tea, bread & butter and then at  
6 p.m. supper. Supper with rice,  
noodles or potatoes with a hash  
of chopped up meat, potatoes, peas,  
& very few pieces of corn. If some  
spiced with onion - family likes  
tea, bread, butter, coffee if you  
prefer. Except for some dinner  
they do well in comparison.

one is not leading an active life -  
stayed about 200 miles but not close to  
the Kan. border, but the everything  
travels good but all things to him  
are a nuisance, however, a fresh fruit  
that what one misses is especially  
in the absence of fresh vegetables

Capt. is Carlos Rojas, + one of  
the deck hands, Sandoval  
Velazquez who could write but  
tried to put his name down for he  
made some marks like the

... I thought he must  
be crazy. And I find he got less  
sense than any of the other six who  
sleep forward. Steers ship at  
his whim. The wheel in the hands  
of a young Italian who is not with the  
hands. It is just about what I thought

Wednesday Nov 30 1926 (This is all being  
written Sunday am Dec. 5.) The sea is  
smooth as glass, scarcely a breath  
of air, but smooth as the surface  
is, the rising and falling in the pool  
would say the keening totem of the  
Pacific. The quill is certainly  
treacherous, making great kells  
in valleys in some of which we see  
quite flat. I made another lower  
haul than a.m. and got quite a  
different lot of stuff. I shall have  
to hold off with more hauls till the  
night before we get in. I had a  
few bottles in my over crowded  
suit case & the other boxes are boxed  
under cargo in the hold. Besides the  
wind & sea were bad since the  
evening it has been impossible to sleep  
on the journey & otherwise I have  
the fears to take the drifter to the  
south for me. It is next to impossible

and asking too much. The sensation  
was a little better by the weather. The engine  
recalled them a lot to learn.  
Wednesday Dec. 1. I am freezing. Now  
they are melting away with the oil  
on the engine and we are just boiling  
along after a four night run. And  
rather a down + sideways cross crew  
motion. Thought I'd gotten my sea legs  
yesterday, but maybe not as I don't  
feel any too well. The way I  
haven't written these notes up till  
Sunday except for a scratch in scraps  
of paper. He didn't get actually sick  
but felt miserable enough to quit as  
the spot had not been possible. Got  
to hate the schooner and everybody +  
everything on it + didn't want to see  
a scrap of food. The worst spell  
of unpleasantness I've had since  
the earliest days on the Albatross.  
This morning saw a large

12. Saw fish (mola mola) at a little  
distance I thought it a shark for  
the size of the underwater body and  
the large fin that stuck up out of  
the water. I hoped it attracted  
attention I threw some scraps of  
fish (bundled up) over board & sure  
enough it came up practically  
alongside, attended, would you believe  
it with about a dozen small  
dog fish, or little sharks I am  
not sure. The water was so clean  
& the fish so near I dodged behind  
my camera as he got on board, it  
had gone off. Whether the deck  
hands scared it or not I can't say.  
Also saw a large "albatross"  
and two or three smaller birds  
gulls? of much the same manner  
of flight but more white. Saw  
had a stamping breeze all day  
Coke & Cedar

with a good deal of rolling + pitching. 13. He  
makes quite a lot of water. The pump  
out of the three different Rtd comfort  
men's every four hours.

Thursday Dec. 2 nothing to say. Feel  
more miserable than ever. ~~Top~~ wear-  
ing this ceaseless motion is on civil-  
ized nerves. I just would not sleep  
for a few moments. The thought of  
food nauseates me & I have spent  
considerable time on deck, but that  
must be chilly miserable as I feel.

Thursday Dec. 3. I still feel rather miserable + make a mere pretense of eating. Wonder if the Capt felt it a little too. We made the coals scrub out the inside of the very sooty tea pot, then lay me out + a soldered iron spoon. At once was white handed again. On the distance we saw what looked like another shark.

14  
headed our way. It's funny how the  
marine animals will never get  
behind a ship. They meet. The  
course brought him about until  
shape really a little off. But  
nothing to it but that he would  
steam ahead & pass in front of  
us. As he got along we saw at last  
a small whale 30-35 feet  
long. Round head end of a sort  
of greenish brown color. I colored  
redish & dotted with darker spots.  
The ship was heaving, rising & falling  
considerably & as he right-angled  
across our bow, he was just  
matters for the bed came right  
square down on his back. Shoved  
the ship as though we'd struck a  
rock or log of wood. Presently  
he tossed up a column, blew a  
mighty spout of water, with a loud

smoke and noise, like the bark <sup>15</sup> of a ship, and as it seems wobbled on his way. The Capt. who was behind a gun, up to see what caused that he had said no Buller's. (a call to)

— But when all the motion over stop. Luckily there no sleeping gear tossed from one side of gun pulled to the other. Of the both for Friday night and Saturday.

Saturday Dec. 4. Strongest day - light would never come. Early breakfast comes at 8:30. I've been out

and the coffee at 6:30. This

morning starch + fried mutton + fried potatoes

in hand, great globe of cold land

adorned the flatter. Why did I

bring some preserves, or canned fruit

Regular breakfast. Rice soup, with

boiled potatoes in it. Boiled rice, with

little amounts of fat meat in it

Boiled lentils + some strong spiced  
 salt meat, + tea + bread. Supper  
 Soup made out of the lentils mixed  
 up with chunks of bread floating  
 around in it, baked meat + boiled  
 potatoes + some chunks of meat  
 turned in a butter soder with  
 grease. Sometimes we have beer  
 boiled green peas, a bean, but  
 always the supper soup is the  
 lunch stuff he is rice, noodles  
 peas bean or lentils. // The  
 Cattle dog is named Sammy. The  
 first time I've heard that name, in  
 all S.A. / A female police dog but  
 under pitbull duty has never been used  
 in the yard since her owner in the  
 cart kicked her clean. + This dog  
 sleeps in the living cabin under the  
 dining table all night long. We

a stiff neck the first few nights it  
works fine now.

Sunday Dec. 5<sup>th</sup> Pled I got  
caught up to date with this  
scribble and my sea-legs. Cold  
fine & humming in a bear. City  
quite I had of the early breakfast  
here for the last couple of days  
I thought I'd rather die than eat  
another bite aboard here. Yesterday  
afternoon we thought we would try  
+ ordered ship. But we proved to  
be a false alarm + we went back  
on the regular course. This a.m. we  
a trace of it in the fog. You  
see the prevailing wind is S.W. We  
want to get almost ~~S.W.~~ S.W. 20<sup>th</sup>  
we head W till we are N.W. of  
the island + then beat, or back

V. J. 270 I. L. V. J. 1911

gives you some idea of how rough  
our trip is. I intended of 370 miles  
I guess we will have gone 500 before  
we get to our destination. That  
makes me miss the Sotos unless I  
go back almost without going where  
for the boat will only stay over night.

It's been a week looking a day since  
we started + I've lived aboard two  
days longer than that already. Who  
would have thought it tonight  
makes some nights aboard this  
little craft, + goodness knows  
has many more. — It's been a  
young century + her life times  
so far!

Monday Dec. 6. Made a couple of hauls with Larner last evening got some luminous copepods, some starfishes (Myzidae) with luminous photophores and an brilliant silver fish. I did not notice that it was luminous last night but body has lost a little organs inside. The silver was like ~~brilliant~~ it was so bright shining. Then there were a lot of brilliant blue mollusks. At night by lamp (Kerosene) they looked greenish to black but the next a.m. (today) after a night in formal were a brighter Cantharide blue, apex darker.

The Monday today 5:30 haul had a single salmon red copepod + a number of tiny blue was scarcely perceptible unless one

21

Expended very largely (as the plan) indicated.  
There was a small boat but only 5 to 6.

But 11 and 3 made a couple  
of hauls got a few big specimens,  
an amphipod & long crust, the last  
two obviously lost from slide bottom.  
Later in afternoon and evening the  
breeze freshened and cold and heavy  
we met. The day for a wonder  
was quite calm. But the mist  
was being over hauled in detail &  
the most troublesome cylinder, carbon  
cleaned. Last night it lay  
down on the jet completely & refused  
to budge. There was nothing left  
but to spend the night day of  
our journey, our motor was hauling

now after all our trials & tribulations  
we are promised a ten o'clock arrival.  
The island is in sight, but seems  
to go for any such speed in spite  
of the re-gummed motor.

Even though with all the delay  
the water (fresh) supply has almost  
given out + yesterday + today after-  
noon (3 p.m.) there was no water  
well on there with meals. Then  
with the immensity of our animal we  
did have it again for supper.

Now all hands are engaged in  
pumping up the exhausted air lantern  
being a diesel motor it starts with  
compressed air. The man who was  
pumped up for but used in the  
boat the engine started after last night.

One of my afternoon trips was made  
 taking the boat out + went off  
 to the old station. About this  
 time the kids were jumped out  
 again, + an the afternoon for  
 a good deal of oil being sent  
 in from down at world of oil  
 net + a ~~lot~~ of oil. The then  
 steersman, he with the home  
 made "gas" pump, lifted the net  
 out of the water very kindly + tried  
 to be real in the hot sun, when  
 I went to get my net in a jar  
 of dry as a bone. Guess he  
 thought my net would keep  
 better dry than wet! I didn't  
 ask him as I was more than  
 thankful to have it made it an oil lot.

24 Sunday Dec 17.

Here I am in Jacob's Landing, the  
house of Rev. Leonard. Where  
Mr. Alvin Bryan stayed when  
he was here. He was fortunate enough  
to have 45 days in the place!  
There is a busy fishing center here  
for long-stemmed boats from the  
immensity of the fishing days  
one. One of two companies of  
here, the Pecan Company, who  
caught no more, take out 90,000  
live lobsters a year, sending them  
as far as B.A., though there they  
reach their place are cooked and  
headed as usual, going down as  
far as that place. But there  
over 10,000 a month, the cost of  
the lobster sold in the good month  
of which this is one. It makes  
trips a month 5,000 each trip.

She found a very lovely old  
fishing village, and by the way  
confronted with the north of the  
highland. Several stores and  
a chimney, which appeared to  
be a mill. The house was very  
complete. But the beautiful  
soft green mountains were  
wooded and dotted with large ponds.  
The lower slopes, our camp, by  
a sudden growth of trees. Really  
the prettiest spot I've seen on all  
this coast of S. C. After all the  
dead days, I had found I was  
till not / who must refresh  
me to the green life and  
the mountains. The house was filled with  
good things - not only the honey  
(the grain) and though the  
little dry stream, my camp was

26 Bashed in with quite a rain. So it's  
best of the day, wait for my stuff.  
get out of the hole with the  
Dango — And with a bag of  
tomatoes in a basket, Oh! the 29th  
of December. — a thing I ought to have  
consequently all regular work at  
though the loading of the platform will  
be done. That's out of the way  
once in two weeks from a mine.

My room, I'm writing this by candle  
light, as the gas is stopped  
of the V. & M. by a little  
little of the gas in the candle & in  
candle in front. // But now I  
can't read my candle I have been  
bored for night here, the candle  
stamps heavily on the candle & that  
worse they are long with much  
more! Just the same as I want to  
and the postmaster's work is the

which can all be taken care of  
 relief, unless they carry them  
 the hills of them I don't think  
 be sent back with the same  
 to be made (from) (all) (my) (last)  
 ted things are not that. I think  
 but I don't. They are added with  
 a little bit of my feathered  
 pallet. / But in comparison  
 a few, I suppose, could not  
 looking with the same flat all  
 a little of my own over them. I  
 I think. I don't think it is  
 packed, for (what) I give it; ③  
 fresh fish, with the same in the middle  
 ④ they are all done, a small portion,  
 and let, I think, I think.

having effect in ⑧; breakfast (at)  
 enjoyed 11, dinner (spiced) eat  
 ⑧ on ② course with the anchor  
 ⑧ on ② that must be after noon tea with ②

Wednesday Dec 8 1926. Tuesday night  
to be dated the eighth, a year off from  
notes.

You know that I have about the  
man you said, I know but I  
didn't catch your name, I think  
an unusual name, I guess  
you must be speaking of Smith.

I felt like that at 2 o'clock.  
I said by the way won't you give  
don for me the money that  
there is being held today.

Tomorrow, Wednesday, I think  
here I am in a little Spanish  
speaking place with a Virginian  
a little bit of French in my blood  
you can imagine how it must  
have sounded to the rest of the  
table; there are eight of us here -  
Dad, Grandma, (the same) & the

of the (very) from the 2 girls <sup>23</sup> P  
around 12 - and two boys from  
Cathart / Her and know a few  
words of English - then a French  
girl and I with my  
friend. They have a great  
many more than the other  
kind down to 1 1/2 - 2 km. have  
a good many in English. I have  
a good many know to see me by  
all the good to do and work with  
good. I have a good + many  
standing as far as I know. I have  
to get them the good + clean,  
of these plan. I did.

When the good a man - I have  
out of 50. I have the 1000 more  
as a good. I have a good  
my. The bill 830 of 10. I have  
my. I have the 1000 more

[illegible]

around the more than any, except a  
 few at this time, of the old and  
 ancient. It is now a little left.  
 Shambhoo. -26-  
 from the same old house. It is  
 all made of old brick 70 725 there.  
 making the ground to make by the  
 a trip to the house of the  
 with the same old house. The house is  
 has a spring of drinking water in  
 island (Shambhoo) of the (Shambhoo)  
 The old house of 81 John the house  
 the church where a house  
 brother holds forth and he is  
 out of the house. The house is  
 box of wood, the house is  
 the house is a house. The house is  
 in the corner. The house is  
 a house built by the old house  
 political program, and the  
 by the house. The house is

dragons though doing high up in the  
hill-side, and the birds of the forest. There  
was the choir of the church. The  
the afternoon "as we were walking  
the great church door of St. John's and  
the afternoon was the <sup>one</sup> of the best  
was that of a very long walk. The  
of the house (the "dome" and the  
house and the house. The house  
The house was the house. And  
as many houses on the island, that is  
of course the inhabited Cumberland  
Bay side of the island. The house  
the house of the house. The house  
house that the house. The house  
mainland but they are the house.  
but the house. The house  
(the house) are the most beautiful  
of the house and house. The house

seen, but then I have seen just a few  
 natural or artificial. I saw a very  
 fine one in the valley of the river.

The river is very fine  
 here. It is very deep, and the water is  
 very clear. The white sand is very  
 very shiny. It is very fine. It is  
 really a very fine river. The water is  
 cold to touch. It is very fine. It is  
 very fine. It is very fine. It is  
 naturally quite a bit of the river  
 buffer. I was going to see  
 this afternoon. I found much  
 added to the Cannery. I found  
 here. It is very fine. It is very fine.  
 me to deliver a letter. I found  
 walk up one of the numerous  
 back of him. I found  
 was a very fine one.

The work was well done & it was 397

that the quantity of work was very  
kindly done of the R. D. and the  
kindly work was done in a  
pathway that was not very  
rather but it was a well known fact  
up. The one that is partly for the  
L. D. who was in all the heavy  
parts of the island, and chiefly for the  
by the wood cutting & charcoal burning  
Charcoal (L. D.) who did not  
who was found in S. A. As the  
end of the valley in a valley known to  
but not at the base of the valley  
from the fact that a d. on the slope  
I came up a charcoal burners ridge  
Hirond who was informed me and  
I was in the valley the L. D. who  
contain a wide bed of drifts & more

and introduction to the various people who  
 have been brought by Cruise. The  
 thing that took my eye was a cake  
 cake planted by a Frenchman  
 in a floury condition. What a  
 wonderful thing it would be for them  
 they could start plant them if I  
 recall it is a good introduction  
 in the States yet here in the  
 climate it seems to be very well.  
 The Frenchman has a most wonder-  
 ful orchard all kinds of fruit and  
the cherries are just beginning

Monday 13<sup>th</sup> went back to Captain  
 Tier's place to get a picture of their  
 Chunta hall - and in talking (by  
 Spanish) he told me of the  
 beds under the rocks in his place  
 and some examples under the road

side too, the ground was also <sup>44/1</sup>  
thin layer of mud + a quantity  
small shells of *Tridacna*.  
In fact, the shells were just about  
the same as in the same stone  
+ cuts of *Tridacna* small shells, *Tridacna*  
+ some *Tridacna* *Tridacna* a regular dry  
land (found in *Tridacna*) *Tridacna*  
we might have *Tridacna* *Tridacna* *Tridacna*  
complete *Tridacna*. *Tridacna* *Tridacna* *Tridacna*  
I'd one of some very tiny shells unique  
for the island which I hope to go after on  
the day. Just at present there are  
prospects of a *Tridacna* *Tridacna* *Tridacna*  
shrimp *Tridacna*, *Tridacna* the weather  
looks right and the time. Wednesday  
I expect to accompany the *Tridacna*  
in the *Tridacna* *Tridacna* *Tridacna* not  
telling when I should be able to  
get away. *Tridacna* *Tridacna* *Tridacna*

12

Christmas on the island. C. m.

Carpenter's place in a very old  
garden. I have for all the wood  
+ flowers known, putting in  
cork oak, cheese, etc. - ought  
almost in the first time to be  
valuable for / the house. The day  
before I left I was in the garden  
about 10, made me go up to the top  
to see the view, about 9. The garden  
+ 6 1/2 hours, a rather nice garden. I  
then he had tomatoes, etc. etc.  
signifying me that I was to go to the  
place, (sheets etc. & showing the house)  
flowers. They have decided on  
Dining at home, & with the  
grand view. The morning before  
I left the note de ore in the house. The  
are also some steam of water, but  
the house is not a little better.  
and compared to the rest of the island.

Sunday Dec. 17-26 Got up at 4<sup>00</sup><sup>1933</sup>  
but we didn't get away till 5 The  
Junk was a round of my friend's mother  
I haven't time to describe it all but  
glad to have it at 4 again  
the time was, with fishermen on a regt.  
lot of trip, but 24 hrs or more we  
do not return till some time. Third  
weekend in the afternoon! Take all  
quits and have a good sleep. I hope  
I will make a third try,  
I hope not too many / Sunday

found amphipods at 500 feet the  
water here which is very hot all  
springs & flow water, though more  
or less continually bathed in water.  
It is rather from the ground, containing  
land (shells) much and reports  
of course the same by the species of  
the Chamberlain's garden. ~~all things~~

Wednesday Dec. 15. As usual getting  
away about after the appointed start. The  
fishermen intention was to always go  
but they are a little slow. Left the  
landing stage at 5 a.m. and made  
for Bahama de Padua in the Bay.  
The air here was so much cooler  
after getting on the ground. The water  
was quite a little warmer, but  
are exceedingly abundant here,  
+ fresh over fresh than from the  
On the way we had many seen the  
in the air and there seemed to be  
little coffee consumed. The  
stone there is in every boat. It is a  
sheet iron cylinder about a foot  
diameter with a good sheet iron  
bottom punched in it about 4 inches  
above bottom, and has a wire frame  
4 inches for the top, made of  
1/2 inch wire, green wood in the

I did not see any more. That is  
 marked on the map. It is a small  
 creek that flows into the main river  
 after it has run for some distance  
 it flows down a narrow valley  
 and a fine spot for a dam to be  
 with a fine view of the river  
 + land just down the river  
 a lot of it is there. After a while  
 its current is all run out of the  
 dam of course is a small  
 dam to be built not a large one  
 to make a dam is beyond compare  
 Just as better than any fish I have  
 eaten. That one caught off the  
 all along by two sets of lobster  
 net. This one is a very fine  
 + in addition to the large ones  
 lobster. The fish we ate  
 is called "perquillo" but what  
 is with it is not till my  
 collection is determined.

146 While the nets were down, we went down with boat-dredge with a lot of rocks & some sea weed but practically nothing. Laccaria, a tiny crab, a minute alga, tiny & delicate plants & very important large and a lobster puerulus. The tide went & you would say of five hauls all we had time to make, before lifting nets.

There are of course mesh hand knotted webbing, in iron hoops about 3 ft in diam. of about  $\frac{5}{8}$  inch round iron. The mesh is roughly 5 inch, & net hangs about  $2\frac{1}{2}$  feet below ring when lifted. It is attached to hauling line by a 3 ft bridle, at the end of line is put a cork float at surface of water, a second of about 2 ft. The line has above them & then down 5 or 6 ft more a cork float painted black. There is always time

was given to set the tent. 47  
went to show the flat. The  
Acacia tree was a good 47 story  
line with a knot - the center they  
then found. The first of the  
about 2 feet long can be seen  
in stream. The knot together  
back looking from a narrow  
off the "Angell" a way  
The river several degrees with  
knife. Of course given to see the  
with several holes to fault the  
shining in water. 3 or 4 messages to  
a fish pond a low one stream  
of some kind. The boat  
after a rest in left - a party  
piece in the middle for color? All  
but used is up a day or more  
old is pretty strong. Seem to  
have many all kinds of  
water. The water is filled by

48 d. it's quite a job in 15-20-25 fms  
fathom, with any breeze of sea running  
the least number of days are spent  
or calm even in the time of year  
winter so called is pretty much for  
lobsters / I am about twice as fast  
after 3 hr work 30 lobsters of 4-5  
size was obtained. The minimum  
size is 25 cm long from apex  
of head ~~down~~ of anterior  
just below carapace to end of last  
abdomen segment, in line of ventral  
with telson. There is no max limit.  
But ~~these~~ these 30 specimens but  
50% of total number caught. All under  
20 d men are thrown back. After  
first set had been lifted + dropped  
again we had breakfast  
Bread, tea, corn of salmon. The  
shrimp king of the party here  
are of mind from the following  
help in lobster. Only last one  
but also quantity of salmon.

It takes me an entire night about 49  
hours to get 1 bushel of fish and  
keep from becoming salmon with  
some of them - I get what  
you'd imagine but the way  
the fish feel has made in all  
three reds & Kuyda + I get  
down again for all night get  
into Father Bay for at 830  
p.m. / Before 2+3 rats went  
again + bet I got 830 + 900  
bea on the fish.

Here we find a couple of  
langolans looking

Box 9 + 10  
made a couple of corner bands +  
got a number of reports.

The boat was 20-25 feet  
long, being divided by boards  
about 6 ft apart. The door  
is where the fisherman stands.

haul the nets the next of 5th from boat  
 the lanterns are put, + new lanterns  
 thousands when not in use. The 4th boat  
 at one, when fishing open, up to boat #1  
 the third is where the long net is pulled in  
 net to next station is 2nd in row  
 and the first and second holding  
 bags of grain + under the deck  
 box + supply of wood + a candle lamp.

The motor used in running to + from  
 fishing grounds is a two cylinder  
 outboard motor set in a small well  
 behind the fishermen. It is an  
 "Archimedes" stock of 5 h.p.  
 very satisfactory on the whole. But  
 that is the motor formerly + still  
 in use in some boats. Behind motor  
 is another long deck where oil + gear  
 carried. The right motor has  
 10 + 3 a.m. — the fishermen sleeping  
 in #3 space, the boy in #2 + 5  
 with in #1 being the two men  
 think of sleeping under a net.

51  
bent up in the boat and up a tiny  
boat, in fact a small 2 1/2 x 3 foot  
with string and a small net. I shall  
I shall not be able to go more care  
fully later, but I have been full.

I intended I was going to go  
to the ground but I was not  
confident of the plankton net and there were  
none too many, the fisherman  
were busy all day, only found  
a few herring and a few fish.

Apr 3. 30. made two more tows  
Kauls, and in fact a small net  
made of these same stuff in the  
night. After that had  
the first in a small net. 1/2 net left  
nets. Sifted nets about 6 #5  
and got back to Amherst  
May 10. 30. after a long day.

52 Thursday Dec 16 - 1926

We got back to B. at about 10:30  
very little net - green one put out  
on the top of the stone (low one) and  
the long one and kept it very close  
to Valfarner. & then the lobster  
all measured by the long ones  
called before being put in the can  
As the from the fishermen are paid  
B/20 (1 per 25) each above 10 lbs.  
no matter how large the lobster  
winter, they are paid 1/43 and  
April & May when they worked more  
from they get 1/93. These same  
lobsters sell for 10 pence to the  
game at Valfarner. Then when  
lobsters are loaded for shipment  
for the shipment they are taken  
over by Police & checked & short  
are measured by the  
the last shipment at 2,300.

[illegible]

All afternoon I spent for my part  
a reproduction of the river

~~for~~ 17<sup>th</sup>

~~Saturday~~ The 17<sup>th</sup> - 1825 In the  
afternoon I got the use of a boat &  
motor + assistance of my friends  
flashed beside some waterfalls.  
To do some dredging. There is a  
down the short run to English Bay  
it is called to see the "Great River"  
or Sekento cave is a better name.  
That it may have been a dried brook  
but at present is the most desolate  
place I ever expected. The floor  
was very gravelly & littered  
with stones in the valleys couple of  
inches long, small round things  
by the cave itself - a mark  
of men who use the valley for a "wild  
horse pasture", and is a most  
shallow thing, but is a natural  
fist feet deep. I have seen

555  
Selling the account as set down  
the Capt Rogers who rescued him,  
and said he had some more  
pouches also of gold. All feathers I  
have seen of and were taken from a  
little killed a few feet away  
and to see was the better, rather  
went a little from one side where  
it looks like a real cave, which is  
issued by any means of me.

Then on the way back to Dodge  
the motor would not go down. Just  
high the thing, perhaps only  
day I shall get the chance to Dodge  
+ as another he tried about three  
unsuccessful times. Got a lot  
of road + my life was in danger,  
alone as I was. Had to  
tell of this after I was told  
the motor reached them.

Boekstein who had been in

156 Swedish exp. of Stockholm  
in 1915, from the free zone of the  
gun line, of a 2nd class. He  
got a sign of disarmament all  
through the business of the  
Hansen, who gave him a passage  
here. All he had to do was to  
couple of men. And he stayed  
3-4 days - weeks for over 3 months  
I'm told. The Swedish crowd  
that came to Rome & Hansen  
scientific expedition, including me.  
They published such articles in the press.  
The 2nd had the Chilean minister  
in Stockholm. The matter was with  
the Swiss Cons. authorities, and all  
that, after no end of fuss.  
Heads of free gun with board.  
Of course, no made. I was  
able to get my last three days  
died by - I'm not to be  
though the board is free, with not

free all the time. I was 557  
and for the first time  
married a wife. I was at the  
a half a day and got back  
quite a bit. I was at the  
dread had never made a case. They  
complained about the food they got  
+ seemed to have made general  
misuse of themselves. At some  
Hemlock was showing. He was  
different supposed me to say that  
"this is good for you" + that he  
had blood in it. When he was  
accused he replied "I am not a doctor  
I don't know" - to have had blood  
in the blood. Some time later, it  
was related to show how "in good  
particular" they were.

Saturday 18: Starting at 8 am + finished  
fish. Referring to fishing in the  
noon took a line of brightening fish  
+ started on the 11 am or 12 am  
dinner + English lessons + good

58 rainy day up till about 2.30 p.m.

Sunday Dec 17 - 1922. In the evening  
we'd planned on 6.00 start for  
sliding & then fishing but the rain  
didn't start up till 7.00 - 2.00  
and I never got in there and  
kayaks but got a little more out  
2 specimens of fish I hadn't seen -  
a few Ovalipes, well known to me  
but not in my collection. I still  
haven't been able to raise any  
shrimps. The rain brought in lots of  
mud. I'm rather but not dried  
but can find a little crustacea  
to think of. Took Brooksham on  
3-4 minutes for the first time  
finally got it. I wish I had  
sampled during Kilmest. Here I  
think I could make good use of it.  
Worked over the fish preparation  
but the afternoon ended again.

Monday 20, 1922 - 59  
small amount of fine fish, and  
made a lot of fish + dead fish  
into a big pile of fish, 1500  
about all the fish in the  
(a great many) + several fish  
more.

The same party moved  
in camp in the way of edible  
fish yesterday, that I was to go  
to report which we did with  
better success. I got a dozen more  
Ovalfish longer than yesterday but  
still not as large as said to be  
here; my lungs must be about  $\frac{2}{3}$   
rigid from all description.

The net contains a large basket  
full of Vadem, some things  
melt + a few coalmills. The  
latter were in great abundance  
Sunday, but only 1 fair sized

60th say small ones today. The small  
Cordmills - no test in rain today  
being found principally where they  
were before - a line of them being  
a common ~~some~~ ~~and~~ ~~from~~ ~~in~~ ~~down~~  
W. Murrell's seen in the same place.

Pond + early - the a.m. (2:30)  
I went up the bank to the north of  
Chaparral (Pallett) and collected  
1-1 1/2 inches long clay. They are  
much used as food here. I found  
very few of them in the rock.  
I got 800, and a bucket full  
in very little time, and the  
harrowing around. The night  
before we had been to the  
forest + Chaparral came up. There  
even we had the morning  
as fine as in the woods. C.D.  
I'm going to get a lot of sea-  
anemones ~~in the~~ (the house)  
washed to eat them (the house)

Tuesday May 21. Maybe the first  
The three tombs in the first  
to the south of the altar. Queen's side?  
Anyway the area is 600. The hole  
in the wall you know is a day's work  
in stone. The stone is brown. I think  
it is a good one. (red) answer  
must be medieval marginal  
a very nice one. They will be  
corrected and clear for the moment

The Chapels are simply dropped -  
looking down but north. Left 15-  
pence. The original then is  
got to + shown in the first  
Telling with your fingers. Yesterday  
we had with us a little  
egg brackets (half egg) with yellow  
and the other parts of the chapel  
mixed. Finally stumbled in  
+ a group of the best for  
a bundle, moving in a plate.

62

The ~~am~~ are first

Wednesday Dec. 22. Today

for lunch (Dinner) and I m<sup>63</sup>  
say there are just some like what looks  
like you + ~~the~~ some, or fine  
breads for some to what I think  
I say, a mild hand lunch, most  
agreeable + respectful prepared by  
dressed men and women of French  
one could eat any quantity and still  
want more. So I know the house was  
lusted them they are indeed a treat  
There were 65 in the lot I collected  
them we had the balance of the  
Chapman with novelties all the time  
They were delicious too today. I have  
up in croquette form - a lot of  
Chapman cut up fine, beaten with  
a batter of 1/2 cup of flour, a egg  
a little milk for binding, and a  
+ seasoning, some shape and a pinch

64 Royal (taking food) to make  
them suffer & they just don't  
melt in your mouth. The  
direction in the same note  
tendency from cold for the  
hardening of the cream.

"Butter pers que no se pa  
may se pers can may can"

By the way the American literature  
an Koran looking before soft and

There are things I want to try in  
Valparaiso there is "pures" must be  
as a dream. And you present look  
them with much white cream  
much beyond all the rest  
many as they will give the  
climatic.

She is a girl  
all faded in a soft shining  
The Smith is expected any time

now, and may get away on 65  
some of the land to be sold  
highly - a present lot of  
a few more land held for the day  
the Pearl Island

Thursday Dec 28 - I scarcely realize  
how close it is to Christmas. She a  
length + I only packed all my personal  
belongings so that now I stand ready to  
leave with the goods, which still I  
not yet arrived. We did wonder where  
I shall find Vally, but can never  
tell how long it will take. Thursday  
billed them fattened goose for Saturday.

The family got a few more amendments  
for specimens, for the name to go with  
my notes. The fishermen said  
it was much to get me some. If  
the men used the oil, because it  
has the most reason. "hmm" is a  
is a phrase that signifies many things.

Monday Dec 24 In the morning Christmas  
Eve. The Am. ship left at  
2.30 p.m. with the last mail from the  
Island. "Can you find out" more before  
the morning afternoon. It's terrible  
to contemplate the waste of time there  
absolutely nothing I can do but wait  
except saying Christmas on Kilauea  
on the island - we shall see. At  
nearly 4 p.m. and they are still busy  
unloading cargo. An extra motor  
was brought in for extra power  
to be of use to me. It's one of the  
things that kept me from being much  
dreaded. The largest motor for the  
Island is there.

Today we have regular meals, though  
supper was a little more fancy with  
goose cold with dressing & sauce & flour  
with a green? and oil? the same  
whichever portion of the goose  
desired, as it pleased.

The desert was a surprise as they  
did a made of 900 lbs. a yellow  
sided melon. Each kilo with half a  
smaller sugar. In again to be  
brought a first shot and try them. In  
told them get 20-25 million bags  
of small butter melon to the same  
had it you like sweet or spicy  
preserved. The same good as anything  
you ever had, since some are  
baking the sugar, when you eat and  
more get the cold but it's good  
longer for a lot of nothing.

Oh! The new sort of fruit is with  
each of the two ones (not eating  
with a) good and then filled with  
beef. The to call it to be got  
at the plant have it at  
there no movement, a tender

68  
ing can be. was just but then  
less than 1/2 way before. still  
a little more but there for Christmas  
one night in the future a small  
bottle of canning - but not with that  
+ had that whole by now. I forgot  
I had the old drum that  
before the war, filled after all as  
the in place of rice, some  
flour + gallets all in one shape  
Red  
mine with dinner, then  
the duck followed by tea ~~and~~

Afterwards we sat around till  
12 midnight or a little after a few  
minutes before reading the London  
papers received since last night.  
About twelve o'clock we went to  
a regular store and more of the  
goose, and also ~~some~~ ~~more~~

mine, to a fine cake and  
A! looking the gun, we had  
the island were fine, + we all wish  
me another Buena Suerte (good  
luck) I ~~was~~ <sup>my</sup> family to stay + rush  
to the following home. All together  
children were all gotten up for the  
last meal which in the long picture  
of the Christmas. Some of them were  
well asleep but the good room  
brought them around / I forgot to  
ready father we had some  
sweetish drink like the milk  
almond flavo, probably sweet  
milk - almonds + sugar, + cooking  
Of course the midnight strand  
the children thought was  
we sat around till near midnight  
they were all rapidly asleep  
Before returning to bed some of the

50  
blended and then four of them  
set them in a row on the table, together  
with each old pair of paper  
mammals (of the same shape)  
and Auntie the owner of the  
kitchen. Naturally I was all prepared  
for Christmas, but I put a little  
few each in envelopes for the birds &  
American dollar each for the children  
& the last of my good will presents  
a bottle of vermouth for himself  
himself & shared in my own  
happiness. When I went to dress  
a missed my shoes, & when I  
showered had stayed up long enough  
after me to both others. I had  
had candy, quiches, two chocolate  
cocoa cubes, and one package  
of Styria the map of the  
I had admired, & all of

we had ~~about~~ met in April  
the school and I left the school  
had a fine day for breakfast  
Then we went to the school on Saturday

and a few for a change & the rest  
of the Special cubes. There is in the  
very special cube in the little box with  
sketches of a car and a car and a car and  
bits of fruit on top. Maybe that's for  
today. Sets. Different.

The little basket only had some  
very prettily gamine. With flowers  
+ ornamented grass, and all the  
napkins were folded up in various  
manner, shaken. Mine like basket  
more the older. There a bird the  
a candle + the two strands of the  
flowers. (I've learned the  
basket). A very unimpressive  
after I will it, all right.

Sunday Dec. 26-1926. On the day  
of fasting and giving thanks.  
But there was work to be done. The boat  
was loaded all morning for an hour,  
steak Monday. My legs were aching  
for all the running in carrying out  
and suitcase, and boxes. The  
barrel can not be compared in the job  
as with much more trouble than there  
it was necessary to carry one end of  
the box weighed a ton. I had one  
end of an one on my shoulder, pushing  
the box was sliding. Thought I'd never  
make the flock as it was rather rough  
going. The bulk of my collection are  
rocks, with brachiopods + bryozoans. I've  
the former I'd be value. Got 2  
Physicocrinus this evening. They  
fell in which hang around the boat area.

for children. Now the same are down 733  
have been very hard in the last season  
and just put on the water the first of the  
state when they are covered with grass  
and give it numbers of really good sized  
stump about (clean & good for  
fire wood.) I have and have promised  
to come, in due course & I am leaving 2  
of my more precious bottles & some powder

I had to go they have been very very  
nice to me, taking me into the family and  
very frequently and lately - and they  
will take 5¢ per day for all they do for me  
I think know what to do the only hope-  
fulness I have is that in S. H. White's office  
it was Spain. And here with people who  
are well & happy with good food & health  
I hope to be better but I shall  
and then for present for Vally but  
they will not get any more food with

174 accounts for these things, by the way.  
expenditures as these will not be  
come, I am sure, it does not mean  
they have done, but I am sure  
I am in kind, and do not I will  
know them. I am sure I am in the  
last place in the world to know for  
outstanding hospitalities, I may I do  
as fast for them, I am sure, I am sure  
17, not I am sure is a bigger man than  
does, contacts with city life makes for  
most but not different most city dwellers  
are to one another, especially those who  
dwell in apartment for the most part.  
By I can neither find words to thank  
these people, or express my appreciation  
or done with them.

They are the 14 years old girl who  
that means my the whole of her  
in to.

In a way my remarks about the  
Husband. Should not go here, but  
it was certainly wonderful what he  
did. Of course I shall send them  
a few things. The Shepherdman to  
Colonel and so to. They the  
Husband did the same thing for  
him. Albinson Boyer. Then he was  
here. & he was on the Island 45  
days, more than twice, may require.

Then all will be in written begin  
this page, in an act of a lump.  
and covering return to put to the  
here by the Valpp. But  
developing film. paying calls  
& answering a lot of letters  
which about my trip to Canada  
in B. Ambrose. P. P. P.

76 Allenas, the Angloman and Simon  
the director of the museum - Simon  
Campbell & I reached a boat at  
then, and rather rushed  
really found enough to see in the  
down here to justify hiring a boat  
thru the lagoon to the top of the mountain  
group. Yes I also took a small  
as the B. A. museum. Many of  
all in the museum but the same lot of  
of this in S. A. correspondence.

---

The day of leaving the island Dec.  
27, 1926 Monday. Got up  
early to try to find some of the  
fisherman boats. at 5-6 a.m.  
I was busy in the field with  
my films, there too much more

to permit descent for dinner at 11:30  
early, to my surprise I had with a beam  
overhead chair. I had had one at the  
first one and of the day. To my  
I will do further I told in the rest  
I have not heard a dozen I would like  
take a hundred dollars for some  
I then just don't expect, have never  
been! Then began! We loaded  
3,500 lobsters. There morning and  
I got a photograph of the largest  
of these specimens for sent of  
comparing to those of supra orbital  
spine which was 1/2 inch off 8 inches!  
They tell me the heaviest they ever  
recalled weighed 5 kilos! I  
asked them how many heaviest  
a year and he a double digit up  
to 80,000. But I promised  
could publish in 1/2 a month

fishery + the truth is I do know  
The government is too dumb to  
publish a higher figure from my  
note, before they get the numbers  
told me and I could have known that.

We got underway at 12 noon with  
the motor functioning very nicely. Had  
a longish lunch + fixing. She took  
away from me better than the  
one I knew. She caught a  
big 3 foot flounder just before the  
anchorage up. We had a  
route began the first day on the  
about 1000 ft. The boat with hooker  
of the head. I skinned some  
made of fish head. The fish  
from did not + I must say at

delicious. These small ones last  
in making off the head bones, there  
certainly are some of the parts that  
don't come out when you get  
today. I felt fine at the time  
but toward evening I didn't relish  
supper at all. On Sunday I  
was down a good deal, on my back most  
of the time, got a good rest, but  
with much pain to have to go for  
there came day for the cream, I don't  
go down. I suppose I have to  
call it high at this time. Good night  
style, like the midnight Christmas  
dinner, they would not go to bed  
my last night, nor could I as the  
were staying up in my room. It was  
2 a.m. before we called it a day.

80 and had the last round of refreshment  
I know the lack of sleep, from standing  
aboard as what made me succumb the  
next day. So I was again in a  
matter of physical condition as regards  
one thing. Tuesday was certainly a  
most miserable day. As usual wanted  
to die & was disappointed with the first  
and shut & disordered aboard. I was  
but much a well-stomach & can endure  
for to go he drew a full gun & at  
length in sight with a good breeze.

I had expected to find some of the  
same crew aboard for the return but  
beside from the Captain only was  
a former deck boy, who was now the  
cook. The crew gets about 12  
more a month. The deck hand  
& when the former ~~left~~ left, the full

got the jkt. shirt + hand on  
some old dirty clothes, ugly shoes  
little better. The four of us together.  
Korean I didn't change into the  
shirt, till you & I were bloody in P.H.  
only took off my shoes at night, but  
with hands that we took. This  
four coats kind of ~~is~~ shorts, a  
dreadful Korean style and he got  
a roller from an addressed letter  
+ another deck hand got the jkt. bed.  
+ Thursday. I could cook as well  
a better myself even down to the house  
making. I'd like to send you some  
but it wouldn't hurt. Every is  
hole of a stomach except bread & rice  
all the food which was fried (greasy)  
part of the time. Except for the spec-  
ness. Tuesday I could think of  
Oatmeal, nuts, + old butter.

82 Still get fat. I hate to look up front  
house as my wasdyke down many places  
now in the front & I hate to see the  
what you call them gods. What  
saw a life in that book, with  
your little Mrs. Thurst. May I say  
Hess her kept! gave me a whole  
cooked chicken, 2 (two) loaves of  
bread and a ~~small~~ <sup>large</sup> ~~piece~~  
preserves. Naturally I shared  
with the Captain, we ate together.  
mercifully he held the chicken for me till  
I was done, when we had half  
of it & would you believe it set  
the Capt & the "corb". They ate  
the half of chicken, - the grain  
looked, well, for a long time  
flavored with one of those damned  
spices I hate the sight, taste &

small of nose. All for group and 83rd.  
 handwriting more the the body 83  
 warm up in the area + so the hole  
 put it in the flatter got to be  
 + have a little. Glad the 2nd  
 light in the chicken. 1st  
 was for for. 1st started  
 I got a nice picture of  
 the whole group of only - 1st  
 with these notes. The word  
 change by the way are from the sand. I  
 word in the island. - One of its mystery  
 no living tree has ever been found, only  
 these dead pieces of which I have  
 a nice sample. I have B. 1st  
 will left most of it, 1st I let the  
 and I have for more  
 value scientific. The memorial  
 hosted him. Safford was able to tell me

about sandal wood butter & ginger  
 if any one is handy for kindling up -  
 making of interest in the study of the  
 was the man! // The weather has  
 been sunny fine all the way, day  
 & night. The next engineer from  
 here got a summer at all day this  
 all night, sleeping most of the day.  
 But no wind. We had expected  
 to make Valf's Wednesday evening  
 & here on Thursday morning we are  
 24 miles off the coast & 12 miles  
 off Valf's. Looked till 8.30 p.m.  
 to make port, when the pumps  
 gave out & the boat was  
 anchored there. Naturally the boat

Police boat steamed up & each of 6  
a mine officials got a price. I say it  
each. They had nothing on me, but  
the Capt & my assistant I made away with  
seven! ~~somebody~~ in night. I should  
get them on the island for the purpose  
but the Capt was amenable. Mr.  
Crum wanted them & I had to have  
them at any price. Is there an old

story. When I landed at Jander  
Monday, my first after the first two  
of three days, it came home to me  
that I would never be able to get any  
in 5 or 6 days & that I would not  
have money enough to pay what I  
thought would be my house debt.  
The thing quite broke me twice  
from the hotel & I figured

86  
the pension would be equal up and down.  
What was I to do? Graped out a  
check + wireless. Came to me  
me 200 pesos in Guatemalan  
and I could pay up + have done it  
done. Later I sent a second  
wireless from the same place +  
that's another story. They came  
in my cans. Three packages to the cans  
so when I left Valparaiso I took two  
cans with me. But then came some  
sharp corners so I kept them wrapped  
in newspapers + for I realize  
not unfortunately I know how  
through the Empire away - using  
them for other purposes. Would you  
believe it when I was ready to start

concerned me, I find it difficult that  
developed proposed I put them  
well to the best of the the  
re can of the newspaper matter. —  
tell — — I spoke for the fishermen  
the two days the same day and the other  
+ last of the year of the other  
much I would do I had been my  
to dinner and before I  
come down here to come he among  
my trip with Henry. Tell I could  
call him friendly and with many  
+ friendly but naturally I would  
have committed a murder to get  
the boatmen to wanted to do to  
by buying them retail for 10 cents  
they sell for 10 cents the fish and  
2 1/2 cents each or 3 (American) a piece  
The fishermen only get 15 cents each.

88-  
apiece on the island! The very place  
which would have cost 18-20 dollars.  
Thanked him. The secretary is like  
the hotel land lady. You have to be  
wicked to get away from here. I  
never expected to taste an unknown  
kind of thing myself. A man  
fortunately had a letter sent  
me not to go to the station to him  
the same night. and all my stuff  
ashore, but not through the custom  
house - by police letter sent on  
inspection, but the goods were  
inspected. The baggage  
down to Friday morning Dec.  
31, 1926

I left got in hotel about 8 p.m.  
 The landline, in fact, I type late up.  
 It was still going on. Then later  
 I got up and I started on  
 my film, finished at 2 a.m.  
 slept till 8. went to see Ann  
 night after breakfast got bags and  
 of Cambridge. I was worried  
 but could do for the I believe in old  
 returned Ann her money for cost  
 of film, so had to wait till bank  
 was open. Paid money, called on  
 Ann and got mail, had to wait 1/2  
 hr. to see her. Then, tried to  
 see Henry to thank for help, but  
 was busy to P.O. Ltd. came  
 back at three for packing of  
 my baggage. Saw Henry

at 12 after a long wait aft. lunch.  
 Then after 11 am I was going  
 to do the rest of the laundry & also  
 laundry on holidays I thought  
 I have around to do some stuff &  
 send them with my bread & butter  
 gift. So the rest of the part from  
 at I missed my friends part of the

Friday night I got started on  
 films later I got finished at  
 6 a.m. I believe it is now  
 got three hours sleep & spent the  
 next morning with some relatives &  
 the church - my room I had to  
 refuse the and the house to clean  
 make the bed. Oh yes I had  
 to get a ham and for, I was a

night, had not over a month left.

Saturday Jan 1st 1927. Dressed

up room a.m. & moped around a  
bit looking for some confessions. Expected  
to get them notes up to date but could  
not find them. After lunch I got restless  
& decided to look up J. J. G., in charge  
of the little local museum, to  
arrange for specimens a cabinet etc. etc.  
He was from Boston, but came  
down here as an infant. Still  
speaks English, mother & sister in  
Savoy on a 3 mos summer  
vacation. Went to get to J. J. G.  
I had been mis-directed. I had  
a couple of hrs. The other time  
he was a week I went by auto.  
Finally with a little help I got  
to the right place. With

the seven (plus) hills of Lifford  
 it's not as easy for a stranger to get  
 around, & hills make the narrow  
 streets crooked. "The Boston  
 dream of being. I'll be all  
 getting back to going slowly. I'll be  
 Boston when you ~~stop~~ to get home  
 where, why here you turn around to  
 find you stand. I had a nice day  
 with George after writing for some of the  
 country to leave. I told him my story  
 etc & mixed him in to some little  
 game as he prefers to call them.  
 Some suffer, & I wanted to tell  
 a German of my table parrot.  
 me in the house to a country  
 to the house & after a while  
 home & talked a bit, it was 1.30 am  
 again.

Sunday May 2 1927. At last  
we are down to the bottom. After breakfast  
have a catalog of my films. Then  
walked in the afternoon. To the  
to the market and to the lake with  
with a fisherman. I have been down  
I arranged all I wanted & more  
down to a restaurant lunch with  
a reporter of the local paper. Can  
you tell me the K. Y. Jones that  
I'll tell you K. Y. Jones. Unfortunately  
we can't pull off the same thing  
any. The fishermen are not  
happy now. For much holiday  
after sleeping off a big day  
explained that they are still busy  
standing for the day. Learning  
much in purchase during the day.

period and before & until the present  
 in books again. There's no book to  
 be had out of them for love or money.  
 I am always in the right place at  
 the wrong time. Don't be able to  
 get in trace warehouse to get it. It  
 is only for him. even if I had  
 time. And I go to him / always  
 has a hotel with him. he brought  
 it & it did I & my little man.

Then German salesman etc are all  
 educated up to appreciating scientific  
 work of any kind, a "damned" (I  
 take the liberty of using the phrase  
 word of Billings) more than most  
 of the Americans I know and, it  
 is the purest & cleanest type.

95  
Mon Jan 3, 1922. Sunday - mail  
had at - should be in a very good  
state - being the state the member in the  
store. Kelly was in a very good  
his attention. John was in a very  
of city, especially the general state  
in a very good state. John was in a  
P.O. for the, the condition at 7:30  
state of John the state of John  
last Sunday. John was in a very  
ed actually for the state of John  
of the state. John was in a very  
last after John the state of John  
for the state. John was in a very  
good agreement. John was in a very  
ready for the state. John was in a very  
the state. John was in a very  
the state. John was in a very  
the state. John was in a very

Sunday Jan 4-27. Got up early  
 packed the car after breakfast  
 came roughly to the house and  
 found out some to the hotel. I felt  
 that had to say the same but  
 went back to the room and  
 the summer and a couple of  
 couple of hours in the car to  
 drink.

I went to the  
 11 o'clock dinner. I with the  
 deluge in getting out of the car  
 5 p.m. before I got home. The  
 was fine. Just a couple of  
luche and some cochallullo

"good" luche is good. I had  
 from the whole of the day.

198 Wednesday Jan 5 Well a fellow has  
been trouble along the both sides of the  
drinking there is no coffee to be made  
in town. he was at the Co. Store &  
was not at home & the phone was out  
only one barrel of corn for the  
week to be made to come. The  
carpenter tried to get some but  
was not. Finally I got a  
barrel from up and read the  
gun & would run out. Can't say the  
stuff will survive - of and about  
my first experience was a little in the  
way. The rest was good. The other one  
in the ship were of the (Hornby for the  
Grace Co.) and I believe they would  
have even taken the last barrel for  
me. (The 3rd officer and I  
for everything & though I thought they  
could not in carrying it on

doing, he said he would like to see  
 if we can't trouble. He said it was the only  
 to keep an eye on it & keep a good eye on  
 it. After that I said to him I was  
 the window opened. He said he was  
 a friend in Santa Barbara, who would  
 be counted on to do everything for me. He  
 been there for years as a sort of agent  
 and change of operation in the end R.R.  
 and mine. Should you see him  
 from Los Angeles. I think we ought to  
 do something for him - like supplying  
 him with a handle in the first place  
 give him a good game of the, but the  
 smooth & rippled etc. as well as the  
 permission to carry out action & keep  
 with it. He told me of no end of  
 things he might be able to secure  
 had he had the game. Besides  
 we should try to do something more

and I am not further. I do not want  
 me, I am just letting the world  
 see with you and a letter in hand  
 we neither expect a reply from you  
 (I do not wish to interfere with  
 I am too kind to do so)  
 I am full of anger to do so  
 He never does not want to follow for  
 fear getting permission to carry a  
 gun will be too troublesome. And  
 for these American scientific workers  
 these letters are not always the only  
 demand, or always the usually  
 free government publication. It  
 is always too easy to send a  
 book to the printer and of course  
 popular interest of the matter the

greater hub. Or else some smaller 401  
can use in their work as collections.  
Remember I say - All he wants is  
some strong beating from any side,  
purely for an urban standard in his  
At last describe the important  
collection of flags, but getting only  
little and common. A more strong  
change return. We should take money  
having to study our central as they  
as outside of the Bureau fund we have  
no "expedition money" to use for it.  
I want to tie up these matters when  
I return to the power. There be there  
must be as much personality to  
understanding with an individual  
contacts as possible. I'd like  
to spare the all up till I get  
back. Otherwise it will be too late.  
a. can be made much of an impression.

In the afternoon I had to ride to the  
 parents' belongings in my hand.  
 became in the afternoon the children  
 & a basket of bottles to the children.  
 (anything to come to the children of the  
 family to have too many things to  
 a change in the children's lives.  
 or to be for some time in my hand.  
 of some of the children to supplement  
 money. Also among the children's  
 (from the mother's room, though there  
 was just as good, but the mother  
 - from the mother's room to the mother's  
 my face over the mother's. It just  
 at the heart of my heart to make it  
 but I can expect the mother's  
 by making it for the mother's.  
 a day in the mother's room to the  
 chance to visit the mother's room.

which I brought out at 5 in the afternoon  
 home in the evening at 8 PM

Thursday the 6th by the way I have  
 another case for J. J. Still more  
 all the specimens that I have brought  
 a house load off me an amount  
 of my work. As I am away on the  
 sea food dinner. Then a man went  
 out to the garden, collected some  
 a couple of Bat wings, and got a couple  
 of crabs & a couple of fish. I have a  
 load of stuff to be sent but I collected  
 first the birds very late though the time  
 was night. I am depending on J. J.  
 & Peter to come up some stuff for  
 me tomorrow. I got Orchids  
 today & I am sure they are for print  
 But could not get them pressed by  
 noon they are really very nice. I have the  
 Emerald again got a better lot.

104 After work took Orchard and to tea -  
a very pleasant party. Next morning  
S. B. and I went to the mill. Left 6:30  
in late bus and to the mill. Found  
we had a very good lot of wood. The  
blow in the chimney when the fire was  
lit. The fire is a very long time to start.  
I am sure there is a great deal of  
really the affair is a very good  
judging of the matter, of the mill, for  
the words there are very clear, but the  
you can't think of it, it is a very  
than F. sheer & its flapping, and  
here it is done with more style & it is  
hands also in points with benches. When  
you come to think about it, it is F.  
The affair is certainly a very  
pleasant for the S. American  
point of view a very interesting

105  
I think I am ch. B. A. (all)  
I never remember half of the things  
any more. I think I went to  
see Father's old house in London & met  
the architect of the place. I don't  
remember a date with him before. I don't  
remember my last night in London.  
+ I went by Brunel - Brunel Street to  
an evening for the first time to 50-  
(free. I don't think to believe) I don't  
want to go with me. I don't find  
to know him (I don't think of him) He  
remains to me to the end. He  
gave me a present to the Captain  
to his brother in London. I don't  
know it. (Karl's brother, rather  
Carter) = naturally. I don't

Richard missed Jerry had to go  
 and a note. I was to have an  
 lunch. But I had dinner. I  
 up for the same time. I had dinner  
 for the night, as I felt I had  
 as time. I went around to see  
 at 7:15. I found all dark but  
 had a few windows. I saw all off  
 down here the room was by a light  
 in the table with a few pieces  
 in front with the bell. I saw  
 a whistle. I heard a sound. I saw  
 many there were many people. I heard  
 the gate after the gate. I saw the  
 door. I heard a sound. I saw  
 the door of the house. I heard  
 the bell there. After some minutes the  
 first team attendant came to see

I have the journal held in my left 107.  
 which is a journal of the original history  
 of the city of New York. As it was  
 found to be very much damaged by the  
 will of the original owner. The original  
 book is now in the hands of his son who  
 like a father with the pictures of the  
 city. He has made me promise to send him  
 some part of the original of the  
 original.

Tried June 7 my most strenuous  
 day. Went collecting in a wood  
 I expected a good haul - but the  
 had been so high and the water  
 was higher than I had seen it for  
 some time. I was so surprised  
 to be so late. I had good luck  
 and 2 birds. I had 1 that I  
 ample or more than them. I had

the ground pretty thorough, but I can't see  
 more birds justly than there were. There  
 were many in plenty of the 1st & 2nd  
 young of the year, & there were many  
 similar, in pairs & taken from the  
 be fall down on the locusts. But  
 we found some (hatched). Left  
 him to mind a fishing net. The  
 water was still too high for skimming  
 which we caught in a net like  
 the ~~last~~ lobster net only smaller  
 with finer mesh. To come at noon  
 promised J. to meet me there to buy  
 at 3 p.m. in the band where the  
 fishing is for lobsters, on the way  
 with fishing net. Had to look  
 up old deck then, to meet J. & wife.  
 But you know the story. — The

109  
 man did not want to go (they had  
 not yet had dinner). I said  
 and they went to the place where  
 he was waiting. I said to him  
 there is a man, I told him  
 then he said I will go with you  
 promised all sorts of things + you  
 was a good time (I was not  
 had two bottles of beer (I was not  
 still in the house for a while of beer  
 it seems, mostly when I was  
 from I was not - I was not  
 General I was not - I was not  
 to go to the house for dinner. He  
 home in the day. I was not  
 it must be of the kind demand for  
 did I go, first place to the  
 side of the house. I was not  
 has a shop. I thought that is my

will be the story, I am  
 with hope of the history  
 and the second part of the  
 a great world of the world  
 then in mid the world of the  
 one. To be the first of the  
 world, in fact, the first of the  
 lives but in a different way  
 hall in the world of the first  
 meeting. There was a great  
 room for the first of the  
 as to the first of the first of the  
 living together, some of the first of the  
 girls of 12, + 4, came and met the  
 We had a very warm and  
 starter. Then, after the first of the  
 dance + the first of the first of the  
 and the first of the first of the first of the

112  
 and den by melts  
 I have the letter  
 waiting for me + the  
 like other men to the  
 a part of the same  
 I have a copy of your letter in hand but  
 I shall send him some of the  
 opportunity. I intended to be  
 nation and then I should have  
 to send him copy. I trust I  
 them many I am glad to see the  
 married eye. He did not go  
 Alameda Bay. I have been  
 brought all the way down and  
 returned then and only found  
 after Edgewood with him a copy  
 letter. The same is a letter  
 to him.

I suppose it was necessary to have  
the coffee there ~~for~~ ~~the~~  
the fishermen used a filled net

So you see it was a steady day with  
all the one just day - I don't know for  
Sandwich.

As you can well imagine I am some  
days behind in all my letters. So now  
I can tell you to seek for it that  
afternoon. I was in the museum  
for me - in the afternoon I had made  
friends with him for a while & was  
talking a few minutes about the H. cage  
I suddenly rushed past his cage  
where he was sitting by the open door,  
all unthinkingly. First thing  
I knew he was on my elbow & I  
felt a sharp pain, by the coat a bit  
but it was just a slight scratch.  
I was not at all with him.

and now its ancient history. Can

Jackie's carting the mail of the  
 place in S.A. The day was clear  
 + bright. My 2 m. in the  
 one of the best. Walked about in sun  
 outstretched with hands.

Sunday Jan 9. G. to P. about  
 7.30. Had him in short sleeves  
 to the house in a coat. He  
 been in a bit of a cold lately  
 with a low fever. He is  
 to museum to try to come home  
 but with no success. After some  
 hanging I noticed the sign on the  
 during the month of January + got  
 Can you beat it. Well it is not  
 as Washington here was (Washington  
 in mid summer I mean) so many  
 people going to the museum with  
 suits Sunday then arm I follow  
 along. Right in the Quarter

handed, a big party, with me # 117  
the house was a small one but it was  
kind of cozy. I remember it of the  
in the old kitchen and a large table  
dip. While I stay one who should have  
up + stand along with the Bruggen.  
A delicious spot all I could say.  
pleasantly. The house was wife  
has gone to the country. I wish  
him to come with me. Before that  
however, we went over to the river. I  
I rolled up my pants + scummed  
ground under the rocks for little  
shrimps + crayfish. I got without  
me. I took them when you are  
dressed in your Sunday best. I hear  
me was a place where the city  
trash carts / but I shall dump  
apparently spilled them to the  
trash / dirt + sand bags all over

together. The people of Iroquois were also  
 a dozen or more, men, women & children.  
 all of which I found with the cargo of  
 pigs which had also fallen off the  
 car - as it was dumped & the  
 people were taking the stuff -  
 I had would you take some. He  
 an unpleasant sight, but I  
 can't help but remark that  
 the stuff was almost dumped  
 my shoes & kept in the trunk  
 (yes) they picked the head and feet and  
 the sweeping -

After lunch we had "lunch"  
 as last, and pulled out (octopus was)  
 (like fried butter in cornmeal  
 only more tasty). The lunch was  
 well liked and of good food stuffs

water still from, also (the ground  
had still on it) - (the ground was  
made of sand, (the ground was made of  
mineral water). After going to the  
to look to look up (the ground is kept  
look after the (the ground is kept  
net + (the ground is kept for Sam  
Bernardo, (the ground is kept 12 1/2 (the ground is kept)  
But found only some (the ground is kept)  
in the town of (the ground is kept) (the ground is kept)  
much (the ground is kept) (the ground is kept)  
Hotel called on (the ground is kept) my charge  
of (the ground is kept) (the ground is kept) (the ground is kept)  
found him and. So walked most  
the beautiful (the ground is kept) (the ground is kept) (the ground is kept)  
of the time (the ground is kept) (the ground is kept) (the ground is kept)  
Still no word from (the ground is kept) (the ground is kept) (the ground is kept)  
at the first (the ground is kept) (the ground is kept) (the ground is kept)  
better from (the ground is kept) (the ground is kept) (the ground is kept)

120

Monday Jan. 10 Went by 5:30 a.m. to  
 a.m. found Kim and, but attention  
 and 2 children, we looked up the  
 hill - we went to lunch together at  
 the found Castille had other things  
 for a two weeks trip. But they  
 not going to miss anything and a  
 asked for the cheapest the other week  
 Senor Maldonado (the one in the house, the  
 a Caza (Forest, Shot & Game). The day  
 we came out in response to my and  
 said they were Spanish and  
 I can make a good job of it. (Castille  
 is the only man in the works who knows  
 English & no German was not talked  
 Maldonado was fine + I did get  
 through with it nicely. He after  
 called in the chief of the fisheries  
 division - Augusto Ojeda.

1/21

And I want them to be as good as the  
 house frames. To make efforts to keep  
 all classes of people. I am to  
 me & send to the museum. I am to  
 name them & furnish a report on  
 the structure, and give them half of  
 my author's copies. We are to get  
 a set of specimens but they also  
 want to get for their own museum  
 right in the same office a sort of  
 large remodelled dwelling more up to  
 town (Augustine 1824). They gave  
 me the publication I asked for this  
 an annual report of the Fisheries  
 small but very interesting. It  
 was the letter that prompted me  
 after I got back to my hotel &  
 read it over, to return the paper

day + thank him for (+ also try to) money  
 from the ~~Graciana~~ try along to make the  
 all was straight. I called on the line  
 Mr. Cohen + got a very nice receipt +  
 a check in the apt + for 100.00 the day  
 day when I pay + would be in a  
 ascertained over the phone. The next  
 day at ten I went to the bank  
 was very busy + had to wait  
 line to save time. Had much to do  
 gratification (This was Tuesday  
 Jan 12) I found all pages kind much  
 stood me down to my surprise  
 of his asking the children to make  
 time to have York to do for him what  
 the Graciana was doing for me, carrying  
 up specimens free. They will  
 pass the stuff in formal; then have  
 a representative museum with

again in order to prepare things  
 for celebration. They have all the same  
 fish - young birds - a quantity of corn  
 and up in houses. I was a little  
 surprised to find a few more. The  
 whole celebration is more up to date  
 & modern looking than any I have  
 seen except the one at de Peder -  
 remembered that the other one  
 was old worldy & old fashioned. Both  
 kept them in a right up to date  
 when got a letter yesterday from the  
 Chief of Police inspecting at Puerto  
 Arenas who ~~promised~~ to give me  
 all facilities to see. And then just  
 got that on my own Spanish. The  
 we went back to meeting them  
 I told Mr. Giller good bye & he  
 showed me over the palace

building the house. Good evening to you  
 it does matter as far as to know  
 like there for your representation. He  
 planned to see the house again and to  
 get paint of the trip down there he  
 had promised me. You will see  
 we jumped ashore at different places  
 + did a little bit of collecting. I took  
 one pair of young hawks. He told me  
 it when I was looking at my feet  
 which I had rolled above the blackbird  
 slipped down. He had an idea  
 that I should go out with him for  
 a ride up San Cristobal with him  
 + Herrmann. I went to the  
 latter to Herrmann I was with  
 he + another German. He told us  
 that there by the house a little bit  
 other man's sister, married

a Stumm from Humberch, the  
 German father who came from I  
 had told me about it  
 + when he told Schuchard (Engineer,  
 like manual draftsman 91, I think  
 he wanted to meet me). We had a  
 nice evening in a real German  
 house, all rooms going off in 400  
 and coffee butter and the whole  
 working chain etc. Then Herbert  
 von Stumm lives in Hohenheim  
 Kreis Kuchthaus (R. B. Cassel)  
 his father is from Humberch. He  
 just needs to get about a little +  
 all sorts of ~~things~~ (of life) to  
 to cross. I cannot explain for  
 taking time + space to mention here  
 how important Salvo is

making fiction plots, where we  
 later the characters meet up with  
 (where the threads of the story cross)  
 but there is one of them almost in real  
 life. It struck me as such in the  
 palm tree in the Spanish garden,  
 and it was more beautiful too, as  
 the stories require such men.  
 (This is more confidentially Schuchman  
 + his wife are divorced and she's married  
 again to a man who has been (disgraced)  
 and him to know the truth the  
 best.) // After this I walked on  
 to the apartment rooms in an  
 elegant, purple house, the best of  
 father + brother in the 2nd  
 largest cement works in Germany  
 + Grace + Co have now taken

over the board and agency paid. <sup>127</sup>  
I can see no change here from the Agency  
products, while I have been in the  
B.A. shortly to see him and office  
there. I expect to see him on my  
way home. It was on the 2nd  
to bed, and I had up every thing but  
staying in for a 7 a.m. get away.  
In the afternoon I brought the camera bag  
for my ticket and I went to see because  
I had already accumulated a lot  
of extra junk. I got back a few  
demands that I had better be careful  
with a great deal of more than I  
paid. / This being my writing (after)  
I almost forgot to get it. ~~It was~~ <sup>the</sup> ~~the~~  
a.m. Tuesday, I called on a party  
and good bye + left a few more

rather the underpaid attendance of the  
 mission will get some more  
 for me. Stuff we had discussed before.  
 After seeing Porter I went back there  
 & purchased tobacco which took a long time  
 over the — price. Ed then took me to  
 Porter.

Monday a.m. Ed & I  
 drove north into the mountains &  
 went to the sea for a rest. I  
 got a fine picture of some of the  
 "mariners" (sea-fodder) rather sea things  
 had quite a time, but got a picture  
 of what they had in their hands  
 locos, pieces, and then they killed  
 and we had a good time. They  
 were then for soup. (P. M. K.)  
 This was a small about 2 feet  
 long but they had a couple of more

long shells, some of which were found in the shed  
in the back of my room where I took the pictures.  
Came away with the fine shells, to a house  
a short distance from the house, the house  
was stuffed with many shells.

---

Wednesday Jan 12. Made the train  
after the boy walked me up with my  
kate to bed after getting completely  
packed. I slept pretty light in the  
bus the night. Had her into a bath  
the bathroom window is cut across  
mine, so he was able to throw  
a couple of balls of paper in my  
face! He'd tried to make me see the  
black dog but I could see him  
thru. The ride was the dirtiest  
I've ever made. Not a window  
dust. The car was stifling but  
rather than open the windows we all

happened the day after the 1st of Nov. at  
 rather for the first time. I was  
 we went with the workmen to the  
 chimney in morning. In the morning  
 words are of mine. I told you I was  
 down near the chimney. I was  
 shocked. There were many men in  
 better with the chimney. I was  
 as far as I could see. I did not  
 they'd make a good chimney, if  
 they seemed to be so. I was  
 the chimney. I would like to try  
 of the chimney. I was so good as  
 an hour out of Sunday. I was  
 in the dinner room. I was  
 given interest between 11.45 & 12.30  
 was mine. But the chimney was  
 rotten & high priced. I could almost  
 have eaten for days in the chimney.

The 8 American know the house & the  
 morning with the - not using them  
 due to poor people all of our family  
 3 double seats, got a real mat  
 a Chilean who much from Spanish  
 could speak a little English they  
 teach us in the school. Oh yes, I know  
 of them forget it later for what it  
 is. Later I met a young  
 Chilean from Alto Hermann  
 of Los Angeles, back from vacation  
 in Santiago. To the woodwork facts  
 he & the run together. The  
 hair was about an hour late &  
 it was beginning to get colder right  
 along, by 10 pm. after supper  
 we gave our walk & made  
 the trunk in the kitchen. Gee told  
 was dirty, a nice B & bath fixed

and I don't know how to feel about it. I don't know  
 of the reason for it and I don't know how to feel about it  
 and I don't know how to feel about it. I don't know how to feel about it  
 like a stage of a journey, and I don't know how to feel about it  
 and I don't know how to feel about it. I don't know how to feel about it  
 + I don't know how to feel about it. I don't know how to feel about it  
 don't know how to feel about it. I don't know how to feel about it  
 like a journey with a purpose to feel about it  
 is well / I've remarked at about  
 how stop just like a journey with  
 the nights are certainly not here -  
 midsummer but it was midsummer  
 double blanket + spread, not a  
 the sheet. I saw people in the house  
 with water, and I don't know why  
 + Santiago was looking for  
 The hotel is in the middle of the  
 expected, but not on the 14  
 the 15th of the 15th + 10th of the 15th

Thursday Jan. 12 - 27. In the morning  
 got to C. D. L. 57 Jan 1833 letter from  
 Schenck, a letter from Schenck. Then just  
 have the middle room for the last time  
 & have in full. And then Schenck  
 and the house. It is simply  
 great, many things included.  
 And the beautiful way into kept  
 the work they do going. It is up  
 to all kinds of things. For  
 what they are doing. As a result  
 concentrating on things. Children & com-  
 munity. And the last time. I  
 seen on this case. It is really  
 the class with the St. Paul's mission.  
 I'm getting to be a real St. Paul's  
 mission. I'm getting to be a real St. Paul's  
 & my little family. Any more  
 and the well. And we had a

month in Spain. (last I had some  
 time to practice in Kanto) The  
 most anxious to continue taking  
 relation with us would be  
 will look out for ourselves for the  
 sake of not all getting a new  
 series but also to help you out.  
 There are on hand already 4 Kanto  
 + ways a means of getting more. I  
 the best kind of a formation with  
 returned in afternoon to find out  
 has the most peculiar fossils  
 same with a month like Kanto  
 being. I could not believe it was  
 but has been given plenty of  
 in the fresh condition. The soil  
 are good but well mounted  
 preserved but in need of a little

[illegible]

over a hundred different animals.  
 penguin, seal, bear - a lot, + many more.  
 He says certainly you can raise  
 penguins. Said in some English  
 a hundred + they are breeding too.  
 He will be glad to exchange some of the  
 things + all kinds of the Chinese  
 animals + birds. Has two geese  
 living in perfect captivity +  
 they are rare species with a full  
 letter, in captivity will be very  
 glad to exchange deer for  
 Chub, trout, snake, alligator,  
 turtles, or little bear. Will be  
 worth getting in touch with. Was  
 more to know exactly a person  
 judge for the best bear is the

[illegible]

138 The Zoroastrian and Chalda  
 hunting. I am now with  
 a magazine for the 2nd of October  
 from an Englishman and I  
 shall try again tomorrow. I  
 mean I will get on much better  
 if any a Subaltern but I'll have  
 to leave that with Oliver, and I  
 know it would be a confidence man-  
 placed. / The sign on the street corner  
 directing me to the Zoroastrian  
 [Al Zoro] To the Zoro, a very  
 a drop of air and. But the  
 down here. I think many of the stories  
 are gone i.e. N. G. Shilka. Then  
 for some reason  
 they say Hello, my wife, 2 months

339  
The morning of a day of October  
the place, the first of the road  
with me and a small boat  
Notes of interest I think I have forgotten  
to enter. Tuesday a.m. I got up  
a little early and went to the  
morning paper & while I was standing  
the wind a little way down the street  
a little machine rode up & back  
and a little woman, dressed in  
a little fur coat from the  
hills around the neck, & a small  
came out of the bag, hand bag with  
a bottle of water. Then she picked  
in the boy's pocket & he threatened  
again for the stomach, because the  
woman kind legs & I could not  
believe my eyes when down to squat

with the cup & began to mill. I  
then P. John - some time  
really not before I had  
for my camera. I was with  
girl stopping to talk with her  
framed in her little hut where  
has still lingering around & per-  
suaded her to pose. I was not  
early so I have my last at-  
tempt. I asked the boy to make  
mills to get a day around 200 ft  
and the cup held to 1/2 liter for each  
he got 2 pears (25 ft). While we were  
talking a man with a child in his arms  
came into the lobby & saw I set  
up the camera, so as not to be in  
sight of the rather numerous young  
Dutchmen, and asked me where I

land. I'm not sure. I didn't get  
stayed at the first time & I don't  
know how long it has been in  
this manner. I'd like to know  
how much it'd cost? (But  
which I want to know that the  
got to do with the price of it). He  
went on to explain that the little  
was not well with a dark  
for the a not uncommon for the  
been though it was the first I'd seen  
a kind of line. The man in a  
I remember the last dark night the  
faded like a nation. His English was  
English of a kind. Oliver Schmitt  
tells me Kooz are Chon. Lefers  
am. Lefers (= Chondroformis)

Friday Jan 14. I might have expected  
rain in a country as green as this.  
we had a good and hard snowfall  
about 830 am. I had to make the  
to get off my notes. I made them  
as a result. And I showed them a few  
photos of Zoro-beging. I had held  
off till 9 after noon stopped. In P.M.  
26 glass frame in which they put  
unaddressed & wrongly addressed letters  
as well as those not carrying sufficient  
postage. I saw two addressed to the  
states lacking just 5 cent more, so  
I got the chief of P.O. & paid the  
ten cent centurion about 1 1/2¢. It  
the time but a damned shame. If  
they could only make some arrangement  
where it could be collected at

The other end of the hill a little  
 mine got pinned in a cave like there  
 some kind of a little mine of the  
 of course it happened when the person  
 thought he knew how much to put  
 I suppose and started at on himself.  
 At the Zoo I tried a few more but  
 lights were so strong that I was  
 doubt. Saturday I found a tree  
 fine view there. Took several views  
 of a most peculiar form. I may  
 have mentioned the other day. So  
 afternoon went back to stream to get  
 a few more beetles. Also picked  
 up a few tiny frogs + one large one  
 of another species. Jimmy had  
 arranged for a man to dig me up  
 a few crayfish. They say the ones  
 not eaten here are the best eating.

[illegible]

146th him. He tells me the little island  
was formerly the site of an ancient  
water and mine. Gold is found there  
but only one or two. I was told that  
after mine closed I should  
not have to go to spend some  
time in not working the land but  
the adjacent water. However, when  
one enters a new world by sea, one  
someday on the same line as the  
got aboard the steamer about 4 p.m.  
I found the little tiny state a little  
for the people in it. I think of it  
three of the people in a flag only as  
a square in a berth in a long. I had  
to see my tank and on that point  
I had the tank I had counted on  
considerable privacy, but there  
to put because they are going all the  
way to Puerto Rico, such a life.

I called on the 2nd of Jan. 1947 147  
 time that I was in the hospital. I  
 saw the doctor, the nurse, the  
 of a doctor, a nurse, and a  
 for the study, but I was not  
 kind of a doctor. I was in the  
 a time. But I did, given in your  
 before the doctor. I was in the  
 + am of the doctor. I was in the  
 I see where I shall be in the  
 Spanish. I was in the. The doctor  
 family, mother, her son, the doctor  
 kinds of them but one girl, a married  
 daughter & boy are all going to  
 live with father now in the house.  
 married daughter & her 16. I was  
 married & 14 years & her. I was  
 in a house (husband & wife 13) &  
 a maid. I was in the house.  
 I was in the house. I was in the  
 as the one now in the house.

1948

Sunday April 16 - 1948 - Sunday  
much of the land on the river has  
settled at 4 a.m. but not the  
amount as common a record for  
no previous - but I believe it is  
London - + we must have for the  
(know I think they are just a few  
to some paying the laborers, who are all  
too well a good - in S.R., should  
time - I think of it but I am a  
little early for a time in going to bed  
as late as I could. I believe I should  
never see these fish - I should  
angie the Brim - Blom had a  
red letter - I had been before  
around that I would have been  
would not know know any for  
Salamanca. In the morning  
attempted some sort of the  
know all the things, a very thing  
at S.R. water sample for about

H.I. We spent a couple of days at  
the ... the ... after  
... from the last ...  
... of the ...  
... the ...  
... except the ...  
of the men speak English and there  
a party of 3 older English ladies  
the ... from the ...  
not had the opportunity of speaking  
yet they seem to know themselves  
rather well / One older German  
rather good company I met one who  
trouble with the ...  
they are doing some efforts. The  
idea in holding public affairs to  
further funds and if we start to  
work up them shifts. He said to  
me what did the Philippines, Cuba

150 Elementos/de/ Mineralogía/o del/Conoci-  
miento de las especies minerales en general, i en  
particular de las de Chile/ Por Ignacio Domeyko  
.../Segunda Edición/ Santiago/ Imprenta del  
Fenocanil, Calle de Teatinos, núm 34./  
Año 1860.

p. 254 ~~Gibbsia~~ ... Alumina hidratada.

El señor Germain halló este mineral en la  
superficie de los terrenos volcánicos de la isla  
San-Fernandez, desgranando en pequeñas  
emerciones sueltas, de color blanco amarillento  
o rosáceo, de estructura terrosa i de un olor  
muy característico de arcilla, mucho mas  
fuerte que el de arcilla ordinaria; se pega  
a la lengua i es muy soluble en los ácidos  
sin efervescencia i sin dejar residuo alguno.  
Se da a continuación el análisis (3) hecho por  
don Fernando Solor.

"Jotto, Lookout Peak and Ingleton's Oak &  
Sandalwood Still There

By H. E. C. Branchi  
(Formerly Editor "El Estrella", Valparaiso, Chile)

Story of Selkirk several years after 1704 written  
by Captain Woods Rogers of the Duke.

Before created cruise imagine each Id. near  
Delta of Orinoco.

Charpentier, wrecked there in 1896 volly & Yngue  
discovered 1574

? { 1712 English considered it in treaty of Utrecht though  
militating it for Gibraltar?

Sad Amos 1740 dreamed of conquering this but in here

Visited Morgan (Sharp) by Harris, Hankins, Clifton

Refuge + later Sad Bryan the admiral  
from S.A. revolutionaries.

Sad St. Cochrane

American flag in 1849 one day May 1849 And. Schone Anter.

Surface 37 sq miles, 30 families

Chonta, Sandal wood

Small 60 ton schooner.

Sa Isla Robinson in Spanish put in Valpa  
E. C. Branchi.

Branchi says lookout is 1600 feet above sea level.

Bronze Tablet: In Memory of Alexander Selkirk, Mariner/  
Native of Larock, in the county of Fife, Scotland, who lived on this  
island in complete solitude for four years and four months. He  
was landed from the Cinque-Ports/Galley 96 Tons, A.D. 1704 and  
was taken off in the Duke Privateer, February 12, 1709. He died  
a Lieutenant of H.M.S. Weymouth, A.D. 1723 aged 47 yrs. This tablet  
is erected near Selkirk's lookout by Commander Powell and officers of H.M.S.  
Tropaeus A.D. 1868.

From Chilean coast Pilot.  
 "Derrotero de la Costa de Chile / desde la  
 Isla Guafo a Punta Sama / Publicado por  
 la Oficina Hidrografía y navegación de  
 Chile. Vol. V / Valparaíso / Imprenta de la  
 Armada / 1918.

noticias históricas Juan Hernández o más a Sierra y  
 la occidental más Afuera  
 named after Spanish navigator Juan Hernández  
 who discovered them in 1570, en un viaje que hizo Callar  
 a Valparaíso.

With idea of returning, set some goats ashore  
 in which reason island were much visited by  
 pirates & filibusters who ravaged coast &  
 Continent  
 with object of getting rid of the attraction in 1675  
 D. Antonio de Lea disembarked with perros de  
 presa to exterminate the goats by their teeth  
 to inaccessible parts of the id where they exist  
 to this day.

Dampier visited in 1681, y dejó en ella un  
 indio durante tres años.

En 1704, el Capitán Hårdling, comandante del  
 buque Los Cinco Puertos, abandonó allí al  
 célebre Alejandro Selkirk, que vivió en ella  
 during 4 años 4 meses.

Recogido, en febrero de 1709, por el capitán Wallace  
 Rogers, sirvió de héroe a Daniel de Foë, en su  
 immortal novela Robinson Crusoe.

Sord Anson desembarcó en la isla, en 1741, con  
 tripulaciones de sus buques diezmadamente prescrites.  
 En 1751, los españoles fundaron en esta isla una  
 colonia, que fué destruida el mismo año por

Los Trembles (salida de mar)

En 1761 Carterer encontró a Juan Fernandz  
una desierta y, sólo en 1819, el Gobierno de  
Chile fundó en ella una penitenciaría. Los  
presimeroz eran encadenados durante las  
noches en unas grutas que están al pie de  
un antiguo fuerte.

En 1852 pasó a formar parte de departamento  
de Valparaíso, continuando como colonia penal  
hasta 1856, en que se abandonó, para dejarla  
en poder de un arrendatario.

Bahia Cumberland = bahia San Juan Bautista.  
Some families reside here ~~which~~ que se ocupan  
en la crianza de ganado, en la pesca de la  
langosta y del bacalar que abundan en sus  
aguas, y en el cultivo de algunas legumbres.  
Este contratista saca todas las ventajas posibles  
de la isla, sin dejar gran beneficio para el  
fisco, que sólo recibe un módico precio por  
el arriendo.

"Delights of a Castaway"

Much stuff in  
S. h. museum  
wants fine comb  
in telephone  
to get hung.

Engine of Saviota F.M. Co.

⌞ Semi Diesel 4 cyl.

Seems to me separate Keatons like  
homocycle type would be better + oil  
feed tank should be higher up on  
engine or else so they could be tilted  
up a drum, on a pivot, after draining  
out oil maybe.

~~Will be in movie last night before going to~~  
Juan Fernandez.

Officials graft as because it  
then brings up the nature of the  
shop keepers + the population to have  
+ take small advantage of one another  
(+ determine likewise) lead to petty  
things "slide work" the community  
reported him of their own pockets by the  
"lucky" enough to allow public office sees  
has a reflection of this until they get  
right down to business with sharp  
found deal at S.A. well say now  
behind that of N.A.
